

# Mr. Eads' Bridge

## Reading Across Missouri 2019

An ordinary field trip to the Gateway Arch turns extraordinary when Becky is transported to the 1870s. The creature that sent her into the past wants one thing for her: to learn. She meets the man behind the Eads' Bridge, James Eads, and Laura Ascot, an architecture student. Between the two of them Becky learns a great deal about the science, technology, engineering and math of building a bridge across the Mississippi river.
