

# 2024 Newspapers in Education Series Now Available

The Missouri Press Foundation and National Newspaper Association Foundation are offering a new original free series to newspapers across the country for publication.

This year, readers will enjoy an 8-chapter series that features science, art, language arts and history about solar eclipses. The solar eclipse will occur on April 8 with the path of totality crossing the country from Texas to Maine, including across the southeastern part of Missouri.

A wide swath of totality across the country and that viewers outside the path of totality will still be able to view a partial solar eclipse will ensure newspapers and readers will be drawn to this content. Dr. Linda Maxine Godwin wrote the features with science slants. She is an American scientist and retired NASA astronaut.

Godwin joined NASA in 1980 and became an astronaut in July 1986. She retired in 2010. During her career, Godwin completed four space flights and logged more than 38 days in space. Dr. Godwin is a Professor Emeritus at the Department of Physics and Astronomy of the University of Missouri. The series is illustrated by Philip Goudeau.

This series will be offered free of charge to newspapers for publication until June 30, 2024. Visit [mo-nie.com](http://mo-nie.com) and use the code: **eclipse24** to download the entire series.
